

TP3 : diagramme de classes

Enseignante : Halima MHAMDI

Exercice 1 :

Donnez un diagramme de classes correspondant au code source suivant :

```
public interface Dessinable {
```

```
    public void dessiner ( );
```

```
    public void effacer ( ); }
```

```
abstract public class Figure implements  
Dessinable {
```

```
    protected String couleur;
```

```
    protected String getCouleur ( ) { return  
couleur; }
```

```
    protected void setCouleur ( String c )  
{ couleur = c; } }
```

```
public class Point {
```

```
    private float x;
```

```
    private float y;
```

```
    public float getX ( ) { return x; }
```

```
    public float getY ( ) { return y; }
```

```
    public void Point ( float x, float y ) { ... } }
```

```
public class Cercle extends Figure {
```

```
    private float rayon;
```

```
    private Point centre;
```

```
    public Cercle ( Point centre, float rayon)  
{ ... }
```

```
    public void dessiner ( ) { ... }
```

```
    public void effacer ( ) { ... } }
```

```
public class Rectangle extends Figure {
```

```
    protected Point sommets[] = new Point[2];
```

```
    public Rectangle ( Point p1, Point p2 ) { ... }
```

```
    public void dessiner ( ) { ... }
```

```
    public void effacer ( ) { ... } }
```

```
public class Losange extends Figure {
```

```
    protected Point sommets[] = new Point[2];
```

```
    public Losange ( Point p1, Point p2 ) { ... }
```

```
    public void dessiner ( ) { ... }
```

```
    public void effacer ( ) { ... } }
```
